

FIELD APPLICATION ENGINEER

Who we are?

StarPower Europe is the European branch of the Chinese **StarPower Semiconductor Ltd**, a leading company in the design and manufacture of standard and customized IGBT/MOSFET modules, for applications in the areas of inverters, motor drives, welding machines, inductive heating, UPS, EV and renewable energies. With offices in Nuremberg, Germany and Cadenazzo, Switzerland, we are well placed to meet the growing needs of the European market.

Your Job

- Work closely with the European and Chinese R&D:
- Provide technical support to both our sales team and customers in the selection and use of our modules according to the specific application fields
- Cooperate with the sales team and customers during the design-in phase, especially for customization cases
- Contribute to the drafting of technical documentation, articles and application notes
- Support the identification and solving of problems in the field
- Evaluate competitor's products
- Present technical information to customers via seminars and workshops
- Provide customer support in EMEA and AMER regions

Your profile

- Minimum 5 years' experience in electronics design or a comparable role
- Masters's level degree in Electronics, Engineering or equivalent
- Fluent in English and either German or French
- Ability to work independently
- Preparedness to travel across Europe and to China#

Our offer

- Be part of a fast-paced and growing industry
- Competitive Salary and Bonus Scheme
- Company car
- Remote working/Home Office
- Flexible working hours and self-led workflow

For any questions regarding your application, please contact Peter Frey, Managing Director StarPower Europe on peter.frey@starpowereurope.com

We look forward to hearing from you!
